

# Software **LP** : suite

Intelligent technology

iControl's LP : suite electronic Point Of Sale software is a fully integrated range of applications designed to help you get the most out of your business whether a café, bar, club, restaurant or hotel. Our LP : suite is packed with features and functionality as standard. With its flexible, open design and intelligent technology it is ready to meet your needs.

## What is iReport?

iReport is an iControl Web-based reporting service. It lets clients access the same core reports, found in iControl's LP : suite BackOffice, via a web browser from anywhere there is internet access.

Transaction information is automatically sent to the iReport server at pre-determined times without any user involvement and is immediately available for reporting.

## Who should use iReport

iReport is designed to be used by owner/managers of single or multi-site operations who are interested in harnessing the power and convenience of Web-based reporting to the enhance their business operations.

## Reports

25 core Auditing & Sales reports available, including:

- Complimentaries
- No Sales
- Cash Drops
- Sales by Till
- Income
- Chip & PIN
- Pay Outs
- Master Summaries
- Sales by Category
- Hourly Breakdown

## Multi-site Multi-User

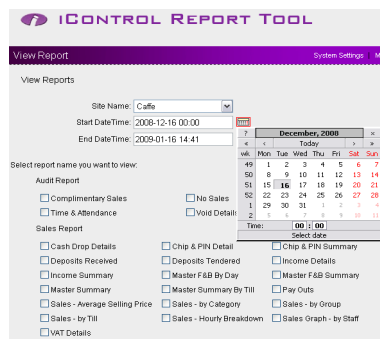

iReport is the ideal Add-on to an iControl installation.

Centralised reporting site-by-site or consolidated is now a viable proposition for any sized business involved in a multi-site operation. Freedom to access sales data from anywhere with a web browser removes the limitation imposed by legacy EPOS systems.

Administrators can even control which Group or User sees what report.

## Resilient and Secure

iReports runs on a dedicated server hosted by one of the UK's top ISP's. They keep operations running smoothly and with increased security and built-in resilience. They ensure iReports remains operational even in unexpected or planned down-time periods of the BackOffice or Server. And, their secure data-centres are some of the most respected in the industry.

### Efficient

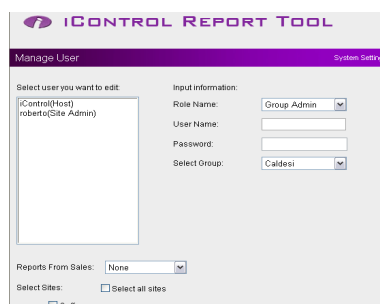

Automated, seamless integration of Business Information. Available from anywhere at anytime via a web browser

| Product          | Total of Till's | Total Sales | Total Cost | Total of Till's | Total Sales | Total Cost | Net Sales | Net Cost | Net Profit | Net Margin |
